

Addition Compensation

If you look up compensation in the dictionary it means weighing or balancing. The compensation strategy means you balance the numbers to make the numbers easier to add.

The addition compensation strategy helps you add numbers easily by changing one number to a simpler one, adding the numbers together, and then fixing the number back. This makes it easier to add in your head.

$$38 + 25 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+2} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-2} \end{array}$$

$$\begin{array}{c} \downarrow \\ 40 + 23 = \end{array} \boxed{63}$$

$$19 + 34 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+1} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-1} \end{array}$$

$$\begin{array}{c} \downarrow \\ 20 + 33 = \end{array} \boxed{}$$

$$28 + 46 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+2} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-2} \end{array}$$

$$\begin{array}{c} \downarrow \\ 30 + 44 = \end{array} \boxed{}$$

$$39 + 15 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{} \end{array}$$

$$\begin{array}{c} \downarrow \\ 40 + 14 = \end{array} \boxed{}$$

$$49 + 15 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{} \end{array}$$

$$\begin{array}{c} \downarrow \\ 50 + 14 = \end{array} \boxed{}$$

$$8 + 17 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{} \end{array}$$

$$\begin{array}{c} \downarrow \\ 10 + 15 = \end{array} \boxed{}$$

$$18 + 28 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+2} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-2} \end{array}$$

$$\begin{array}{c} \downarrow \\ \boxed{} + \boxed{} = \boxed{} \end{array}$$

$$19 + 43 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+1} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-1} \end{array}$$

$$\begin{array}{c} \downarrow \\ \boxed{} + \boxed{} = \boxed{} \end{array}$$

$$29 + 24 =$$

$$\begin{array}{c} \downarrow \\ \textcircled{+1} \end{array} \quad \begin{array}{c} \downarrow \\ \textcircled{-1} \end{array}$$

$$\begin{array}{c} \downarrow \\ \boxed{} + \boxed{} = \boxed{} \end{array}$$

Addition Compensation

$38 + 24 =$

$\square + \square = \square$

$49 + 33 =$

$\square + \square = \square$

$68 + 26 =$

$\square + \square = \square$

$19 + 75 =$

$\square + \square = \square$

$19 + 66 =$

$\square + \square = \square$

$28 + 84 =$

$\square + \square = \square$

$18 + 47 =$

$\square + \square = \square$

$59 + 15 =$
