

Calculating Compound Areas

Find the area of each shape then add the areas to find the total.

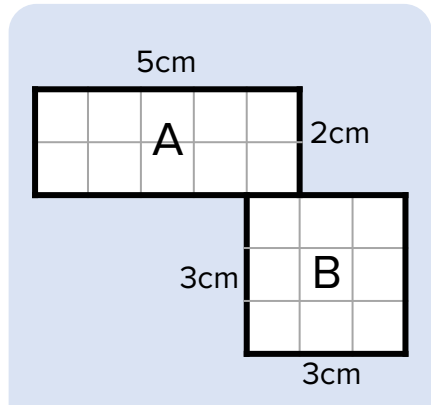

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

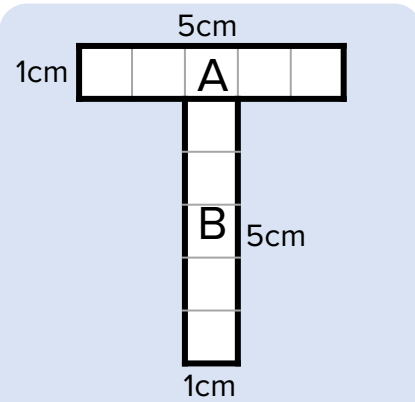

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$

Area A Area B Total

$$\square + \square = \square$$
