

Dividing 2 Digit Numbers

$84 \div 7 = \square$

$96 \div 8 = \square$

$72 \div 6 = \square$

$48 \div 4 = \square$

$90 \div 5 = \square$

$77 \div 11 = \square$

$88 \div 2 = \square$

$91 \div 7 = \square$

$75 \div 5 = \square$

$56 \div 8 = \square$

$72 \div 9 = \square$

$90 \div 6 = \square$

$78 \div 6 = \square$

$84 \div 6 = \square$

$96 \div 4 = \square$

$88 \div 4 = \square$

$63 \div 3 = \square$

$57 \div 9 = \square$

$72 \div 3 = \square$

$81 \div 9 = \square$

$48 \div 3 = \square$

$81 \div 3 = \square$

$88 \div 4 = \square$

$54 \div 3 = \square$

$80 \div 4 = \square$

$78 \div 6 = \square$

$92 \div 4 = \square$
