

Tricky Word Boxes

Rules for Tricky Word Boxes:

1. Write each player's names in the scoring box in the bottom left corner.
2. Use a paper clip and pencil or a spinner to spin a tricky word on the circle.
3. The player looks on the board for the tricky word.
4. The player draws a line to connect any two dots that form part of the square around the tricky word.
5. When a player draws a line that closes a square, that player puts an x in the square and puts a tally mark in the scoring box.
6. If the tricky word spun is not on the board (it has been used up on previous turns) then the player can choose where they would like to put their line.
7. When all of the dots have been connected, the player with the most tally marks wins!

Extra Practise:

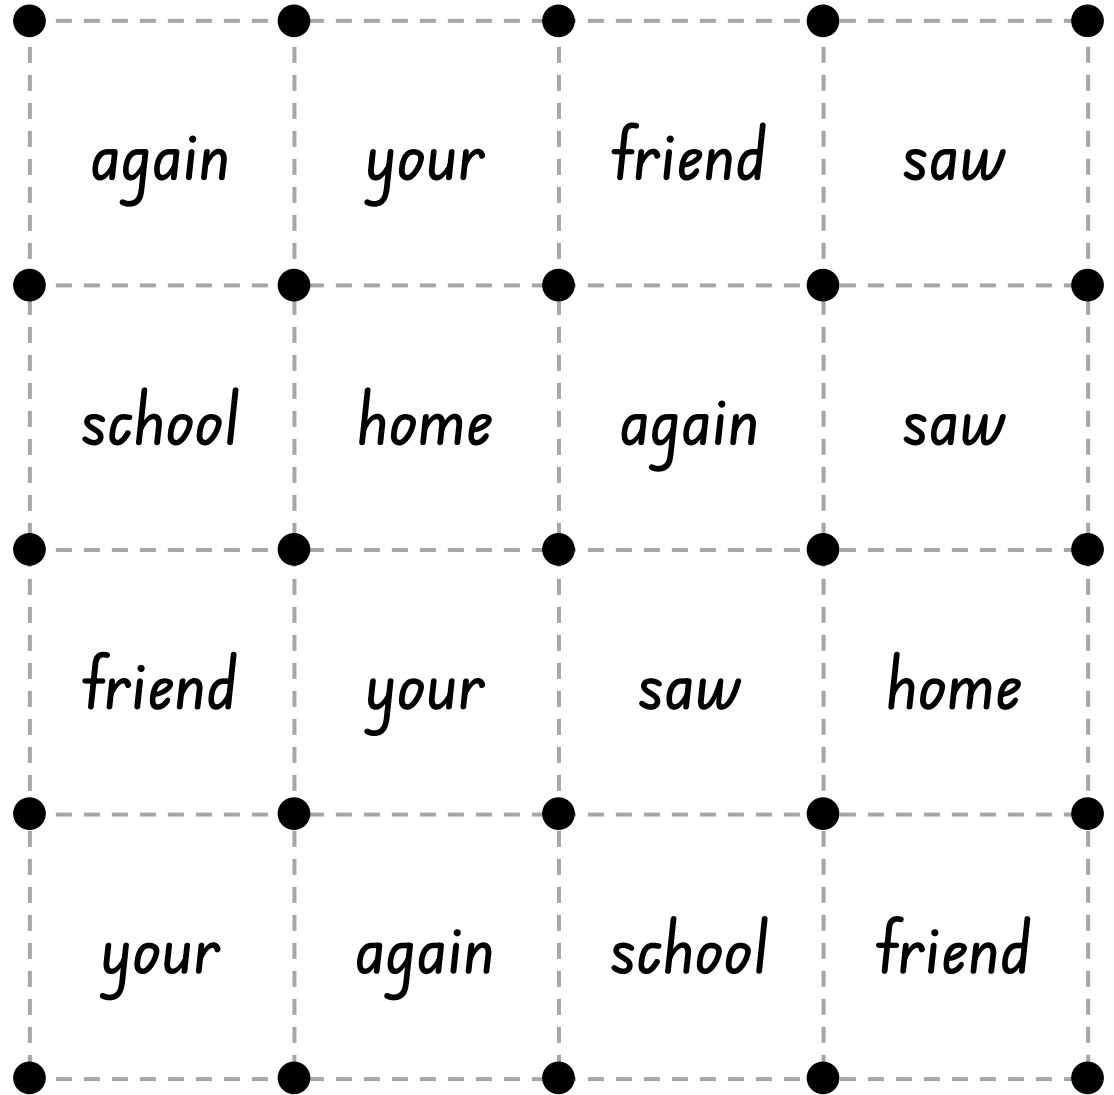

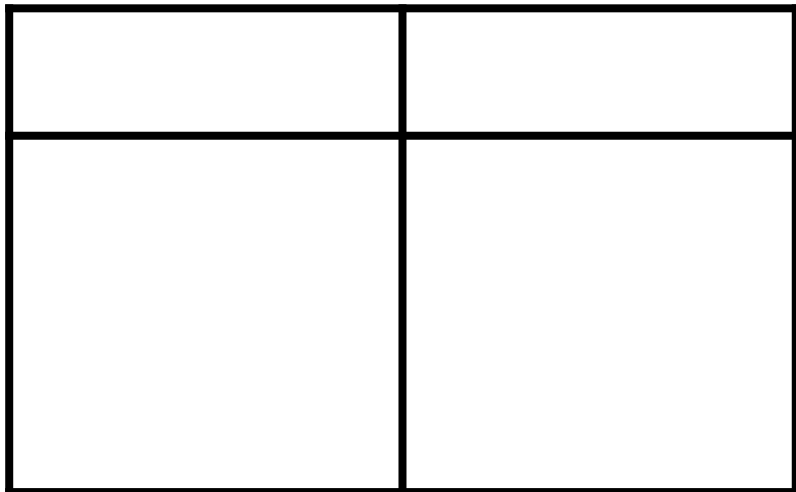

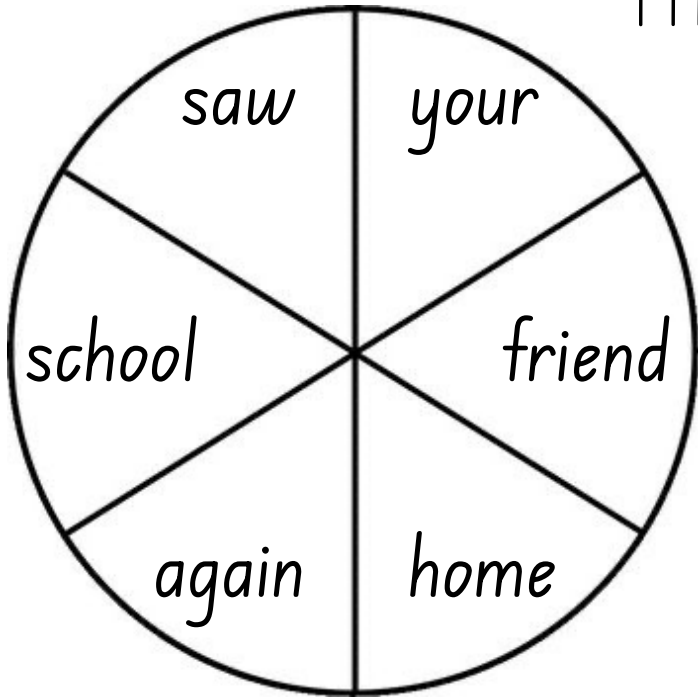

While players are waiting for their turn, they can write their tricky word they just spun on a white board.

The diagram shows the 'Tricky Word Boxes' game board. It consists of three main parts:

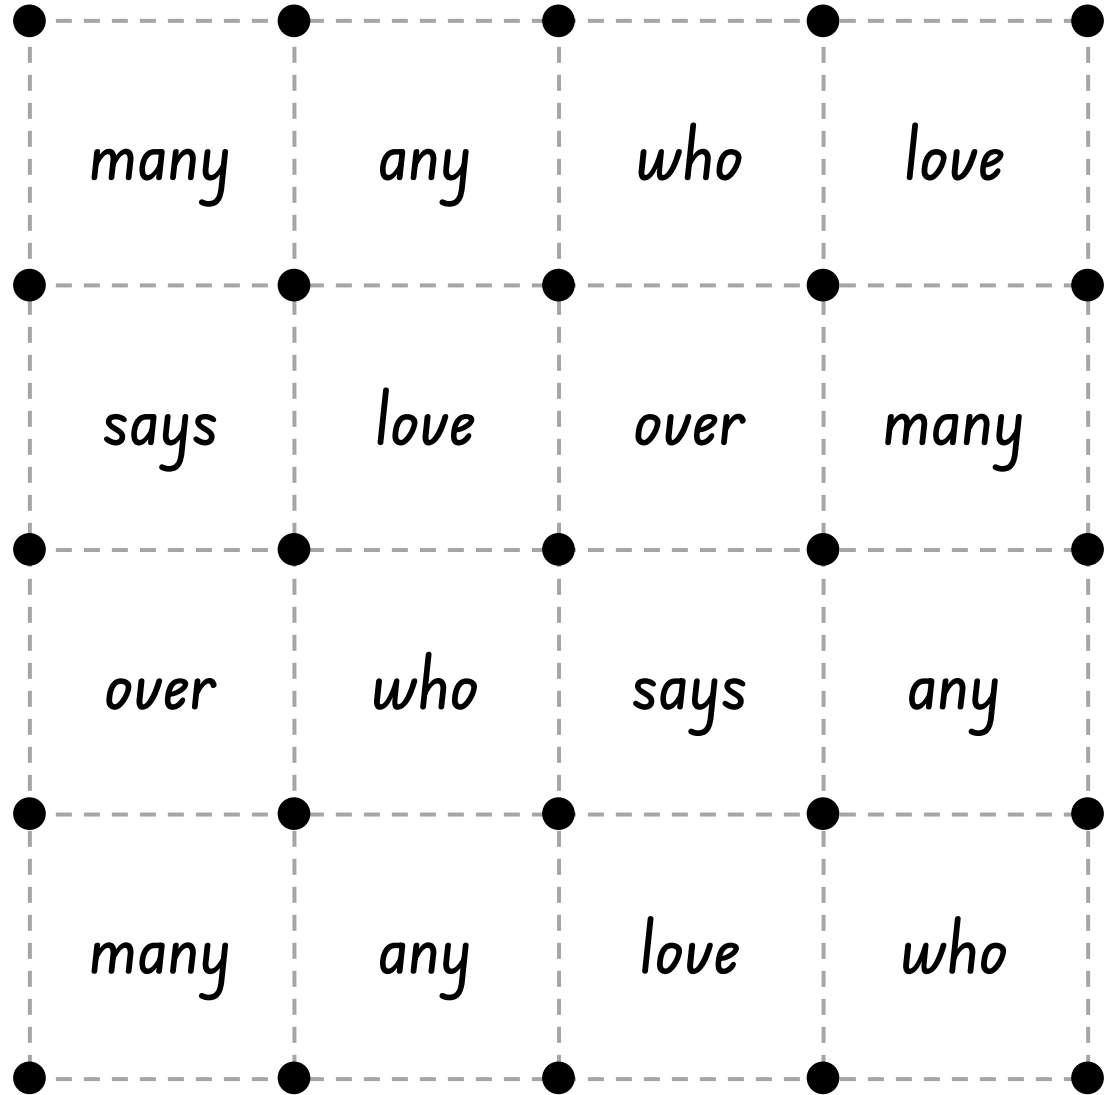

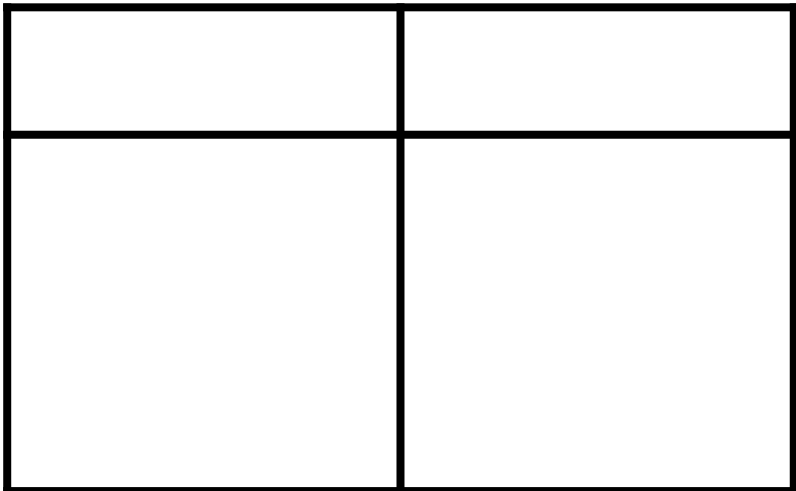

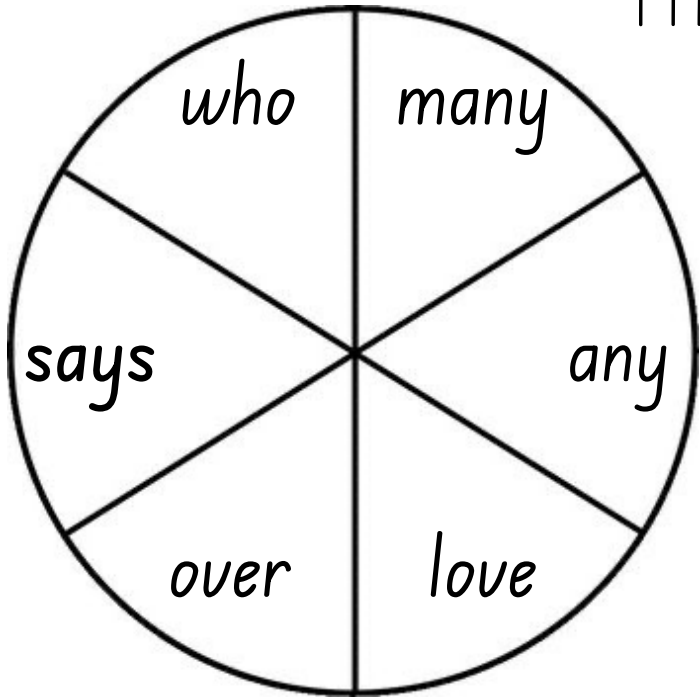

- Spinner:** A circle divided into six segments containing the words: saw, your, friend, home, again, and school.
- Game Board:** A 4x4 grid of words. The words in each row are: Row 1: again, ~~your~~, friend, saw; Row 2: school, home, again, saw; Row 3: friend, your, ~~saw~~, home; Row 4: your, ~~again~~, school, friend. Colored lines connect dots at the corners of squares. Magenta lines connect dots around the 'your' and 'saw' squares, which are marked with an 'X'. Blue lines connect dots around the 'again' square in the bottom row, also marked with an 'X'. Other lines are purple and blue.
- Scoring Box:** A table with two columns for players: Isla and Kayla. Isla has two vertical tally marks (||). Kayla has one vertical tally mark (|).
